

Figma Guide

Creating the framework

1. a Frame is a box that will contain everything on the website.

Pressing this button

will allow you to create a frame manually.

It will also bring up these additional options on the side →

You may also press F to pay respek- I mean, to use the frame tool.

2. Creating shapes and inserting images and videos

This button will allow you to create shapes.

For more shapes, press the downward arrow on the right.

Doing so will also allow you to insert images and videos.

3. Reuse components

Selecting any object will give you the option to create a component.

Pressing this button on the top will turn the object into a component.

Frame

▼ Phone

iPhone 14	390×844
iPhone 14 Pro	393×852
iPhone 14 Plus	428×926
iPhone 14 Pro Max	430×932
iPhone 13 Pro Max	428×926
iPhone 13 / 13 Pro	390×844
iPhone 13 mini	375×812
iPhone SE	320×568
iPhone 8 Plus	414×736
iPhone 8	375×667
Android Small	360×640
Android Large	360×800

► Tablet

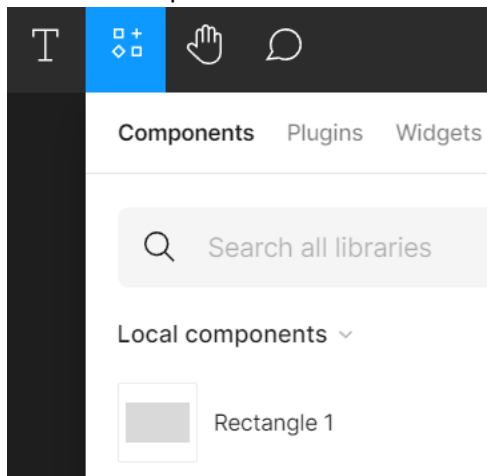

► Desktop

► Presentation

► Watch

► Paper

You can then press this button to access the components you have made.

Drag and drop components to reuse them.

4. Changing the design properties of objects

When you click on an object, it will allow you to edit all the design properties of the object.

This includes: alignment of the object, position, color of the object, color of the text, rounded angles, etc.
